SUMMER CAMP
SAFETY PROTOCOLS – SUMMER 2020
The YWCA Kid’s Place will follow all rules and guidance specified by ODJFS which are intended to maintain the safety and security of our students and staff.

General
• We plan to use a curbside drop-off/pick up routine so that parents will not need to enter the building, stationing one staff member outside to help with signing in/out while another escorts each student into the building to wash hands before joining their group.
• Temperatures will be taken of all staff/students upon entering the building using the non-touch thermometers.
• We will provide masks for all staff and students.
• Staff will be sent/remain home if showing any symptoms of COVID-19 (coughing, shortness of breath, fever), be required to seek medical attention, and quarantine for 14 days.
• Children with a fever or those who show symptoms of COVID-19 will be sent home and asked to return only after 14 days or medical documentation. We ask that parents monitor their child for any symptoms prior to arriving at the program each day. Parents of students with pre-existing medical conditions understand the heightened risk they assume by entering into a congregate setting.
• Frequent handwashing will occur at checkpoints during each day as well as monitoring after restroom usage.

Space
• Groups of 9 will remain in their assigned classrooms throughout the day, including during mealtimes. Student baskets for their bookbags, jackets, lunch...will be kept in the classroom vs the halls.
• Additional instructional and free choice activity materials are being purchased to reduce sharing of supplies (for example, students may be assigned pencil pouches of art supplies with their name on them). We plan to clean/sanitize any shared materials after each individual or group use, according to the item/surface.
• Building surfaces will be cleaned/sanitized at various times throughout the day.

Activities
• We will not be taking field trips or swimming (local pools are unable to accommodate large groups this summer and swimming is considered a field trip due to the required transportation to commute). In lieu of this, we hope to bring in additional presenters/activities and hold water days, providing as much outdoor activity as possible. All presenters will follow the same protective measures as staff (temperature, hand washing, face mask).
